and the market is firm at our quotations.
There was no new feature exhibited in the Money
market to-day, the demand for money being rather
drier and loans more difficult to negotiate. The Bro-
kers buying Certificate of Indebtedness at 97c and
Government Vouchers at 110c is the discount. Gold
declined about 6c owing to the advices received
from New York.
Now we give the quotations of gold and uncurrent
money up to 3 1/4 o'clock to-day:

 HOOD ITEMS.
 For a copy the following from the Cincinnati Price Cur:

The hog market has been a good deal depressed the past few days of the week, owing partly to the state of weather, which has been far too warm for spring, and slaughtering had to be stopped since Thursday. The market was not so good as it was on Wednesday, and much less lively in the market; and prices current at a few cents could not have been obtained even had the weather been favorable.

Prices were very large, and there being no demand of consequence for the products, packers were covering that they could not sell, and prices had to be very low. The market was very quiet, and rather, but as soon as 30 pounds average reached, drivers commenced packing, preferring to do this than to ship small lots, and so, when it is estimated that one-third of the pork and lard has been packed,

ST. LOUIS MARKET.

The St. Louis Democrat of yesterday says:

The business of her killing and packing is progressing satisfactorily in this city. Packers continue to buy in large quantities, and they say all the hogs they care to buy, at the present prices, are getting scarce. They killed 125 head of hogs last week, but they say they will fall far short of last season's business, but will come out favorably with the work of previous seasons. Some pens are getting scarce for light to heavy, and 10 cents per cwt. for extra fine lots.

The work of our packers to date amounts to about the following figures:

.....16,000 head.

Packer & Sons.....	10.00
Rha.....	8.90
Quess.....	4.60
Total.....	(23.50)

CHICAGO MARKET.

The Tribune contains the following:

Friday as a considerable range occurs in the premium portion of the market. Buyers suddenly withdrew many of their doing nothing, and others purchased less than they had intended. The result was that prices were taken, their receipts were almost entirely sold, with less disposition on the part of packers to liberate. There was no improvement in the market. A receipt stated 14,000 head, and the entered 70,000.
